### Course Description:

The course presents an overview of critical care and contemporary critical care practice. Content is organized around alterations in dimensions of human functioning and common problems in critical care. Content focuses on acute situational crises with a dominant pathophysiologic response in which the patient is unstable, nursing dependent and requiring intensive, sophisticated technologies within critical care setting, the practicum is designed to assist students in the clinical application of selected nursing management plans of care in the critical care setting and emergency department.
